

ENVIRONMENTAL POLICY

Environmental Management is a strategic goal for GOYA SPAIN. As such, an integrated system has been developed to achieve it.

GOYA EN ESPAÑA, S.A.U. COMMITS TO:

- *Protecting the environment by carrying out the activity in a responsible way, in every function and area.*
- *Guaranteeing sustainable development, reducing environmental impacts derived from its activity, as well as waste management (subproducts, hazardous waste derived mainly from maintenance activities and equivalent urban waste, mainly packaging material, cardboard, plastic, and paper from our offices), wastewater generation management, etc.*
- *Complying legal environmental requirements applicable to the activity of the Organization, as well as those requirements signed by the Organization as mandatory.*
- *Adjusting aims and goals to the nature and magnitude of the environmental impacts caused by the activity, products, and services of the Organization, in the entire life cycle.*
- *Attending human and personal relationships as key to our success, with Motivation, Training, Environmental Awareness, and Communication as essential tools.*
- *Ensuring the necessary support for a strategic management and its coherence with the Organization's context (nature, magnitude, and environmental impacts of its activities, products, and services).*
- *Maximizing the available resources in order to maintain them as long as possible in the productive cycle.*
- *Regularly reviewing the Environmental Management program in order to guarantee the continuous improvement process and contamination prevention, according to the International Standard ISO 14001, in its current version.*
